INTRODUCTION

CyBit is a Blockchain-based crowdfunding platform that helps people who have the desire to establish a new business (Start-ups) or undertake a worthwhile project. It enables individuals to make use of crowdfunding techniques to raise the required funds. At the same time, CyBit helps investors to evaluate potential business proposals to fund. CyBit is the emerging platform that informs investors and establishes a connection to investors and those start-ups or individuals seeking funding. All these interactions will be possible through the use of a Cryptocurrency token called “CBT”.

Initial Coin Offering

Crowd Investing

Crowdfunding

FOR STARTUPS

CyBit focuses on building infrastructure for start-ups, entrepreneurs and potential Investors. A Blockchain-driven ecosystem changes how people connect with one another in business transactions by enforcing data integrity, accountability, transparency and trust.

Blockchain Infrastructure

Integrates blockchain technology to provide unique identities for each

Easy Token Integration

Every Node has its own token. You can earn tokens by doing work

Global System and Secure

An efficient global system covering all corners, provides best data security

FOR INVESTORS

You'll discover startups you can trust with business ideas that match your values in a secure, transparent platform.

TOKENSALE INFORMATION

10 Billion	3 Billion	May 10, 2018	June 30, 2018
Token Price (During ICO)	Minable Tokens	Pre ICO Start Date	Pre ICO End Date
ETH & BTC	25 USD	7 Billion	1 CBT=0.07USD
Acceptable Currencies	Min.Purchase Limit	Pre Mined Tokens	Token Price (During ICO)
July 1, 2018	Sept 20, 2018	1 CBT=0.10USD	No Limit
ICO Start Date	ICO End Date	Token Price (During ICO)	Max.Purchase Limit

CYBIT SOLUTION

An Eye On Security

There is no such thing as a totally secure site, platform app or account. But that doesn't stop us. We keep an eye on the latest world-class security technology, and tools and as well as on the criminal hackers and thieves who are eager to plunder the crypto world. We do this for security and peace of mind – yours and ours.

ERC223 Platform

Eliminates the problem of lost tokens which happens during the transfer of ERC20 tokens to a contract (when people mistakenly use the instructions for sending tokens to a wallet). ERC223 allows users to send their tokens to either wallet or contract with the same function transfer, thereby eliminating the potential for confusion and lost tokens. Allows developers to handle incoming token transactions, and reject non-supported tokens (not possible with ERC20). The transfer of ERC223 tokens to a contract is a one step process rather than 2 step process (for ERC20), and this means 2 times less gas and no extra blockchain bloating.

A custom Startup Environment

Unlike typical crowdfunding platforms, CyBit's marketplace encourages startups to create custom marketing and promotional content that truly matches their mission. We also provide world-class marketing support for social media and much more. So you succeed and do so by being and howing up exactly as who you are.

Fluidity

Internal CBit tokens can be instantly exchanged for external CBit tokens in our own secure Exchange. Startups can be investors without the anxiety of erratic coin market valuations. If we can't make it all easier and more fluid, why should we be in business at all?

Smart Contracts

The CyBit solution empowers ICO developers to visit the platform, submit their funding requirements, and use CyBit channels to get evaluated by potential Investors. Upon successful evaluation, the Investors will invest in their projects using CyBit Tokens. The entire process is secured using smart contracts. The platform protects the rights of each stakeholder. As it should be.
